## LAVENO MOMBELLO

LAGO MAGGIORE

7-9 JUNE

**EBS-Electric Boat Show**  
3rd Edition comes with a great novelty, a change of location that propels us further than ever...

We are moving to  
**LAVENO MOMBELLO**  
in the picturesque setting of Lago Maggiore,  
**FROM 7 TO 9 JUNE 2024**

This new setting will allow the EBS-Electric Boat Show to grow even further, diving in the municipality project of e-mobility transition, weaving the expo areas into different locations throughout the city, from the characteristic Old Harbour, through the marvellous Villa Frua, where private events can be organised, to the evocative Officine dell'Acqua, the venue for the rich conference programme.

### THE PROJECT

Thanks to the precious cooperation of the Municipality of Laveno Mombello, EBS will once again, EBS will flank mobility on water with electric mobility on land, to pursue all-round sustainability in port areas, which have always been the scene of interaction between marine and land-based activities. Vehicles on 2 and 4 wheels are already part of the everyday life in the microcosm of ports, and it is therefore essential to extend the concept of electric vehicles to land as well.

As per tradition, to enrich its offer, EBS proposes an extensive programme of events and conferences aimed not only at professionals in the sector, but also at institutions, associations and private and public bodies, enthusiasts, and private boat owners who are willing to evaluate new engine alternatives thanks to test drives on the boats made available by the shipyards.

The event will take place in conjunction with the hang-gliding world championship qualifiers from 1 to 9 June, thus allowing water, land and air to converge on Lago Maggiore for an entire week under the banner of green mobility.

EBS-Electric Boat Show is the boat show that was born out of the strong demand from national and international industry professionals to meet on an exclusive stage, dedicated to all those who want to set sail along the silent and environmentally friendly electric revolution, where to meet leading political, tourist, port and economic institutions, associations, schools and universities, in order to become an ambassador for electric boating and an advocate for the protection of our oceans, lakes and rivers.

### EBS TARGETS

During the three-days of EBS-Electric Boat Show the absolute star will be the best of national and international production of:

Boats, jet-skis, water bikes, surfboards, paddle boards, pedal boats, and much more

Charging stations

Electric, hybrid, solar and hydrogen marine propulsion systems

Electric vehicles on the road

Batteries and components

New solutions for public and private transport

Port infrastructures

Furniture, textiles and nautical accessories
